

Aeronautical Center Amateur Radio Club

We would love to welcome you to join us at the Aeronautical Center Amateur Radio Club, (ACARC). We are one of the oldest Ham Radio clubs in central Oklahoma and one of the largest since every active or retired FAA / “Transportation Department” employee or contractor is automatically a member if they are a ham. We have **no dues** and exist by donations and various fundraising.

1. We meet on the first Thursday of the month at the Jim Thorpe Rehab Center in South OKC at 4219 S Western, generally at SW 44th and Western, at 6:30 PM, see back side.
2. We hold our testing sessions on the second Thursday of the month at 6PM in the same location.
3. We hold classes for the edification of the public and as a service to the community typically in the spring and fall of the year.
4. We offer a large number of repeaters to the amateur community for all to use including the metro area’s only active DSTAR repeater on the air. Find our repeater list at our website www.w5paa.com, [.org](http://www.w5paa.org) or [.net](http://www.w5paa.net) and repeaterbook.com.
5. Our club members participate in many public safety and community service events.
6. For more information please contact: officers@w5paa.net and education@w5paa.net
